About Me

I'm a Full Stack Developer looking to be an integral part of the right group. I am dedicated to my craft, work well with others, and will do everything I can to bring value to the team.

Career history

Full Stack Developer at Moonward
Jul 2021 – Jan 2022

Plan, build, test and deploy applications on multiple platforms, from web to mobile, to enable maximum value to the client and their customers

Key responsibilities

- Create and manage project tasks using Jira and similar tools
- Work cooperatively with designers and other developers
- Build user interfaces with React / React Native frameworks
- Liaise with clients over product adjustments

Achievements

- Delivery of Checkit to Apple App Store and Google Play Store

Assistant Restaurant Manager at Grill'd
Dec 2016 – Dec 2018

Leading teams of 20+ members at multiple venues toward the effective delivery of quality experiences and products

Key responsibilities

- Delivering one on one and group training
- Stock management and control
- Local Community engagement through Local Matters program

Achievements

- Achieved mystery shopper targets for two quarters
